

Mohd Mehraj Ahmed

Full-Stack Developer (MERN)

+91 7995440610 | mohdmehrajahmed9@gmail.com | [LinkedIn](#) | <https://github.com/Mehraj2003> | Hyderabad, Telangana

SUMMARY

Highly motivated 2024 Electronics and Communication Engineering graduate with a strong passion for Full Stack Development. Skilled in designing and building dynamic, user-centric web applications using the MERN stack. Committed to continuous learning, writing clean and efficient code, and collaborating in team-driven environments to develop innovative software solutions.

SKILLSET

Frontend Skill: HTML5, CSS3, JavaScript, React, Tailwind CSS, Material UI, React Router, ES6

Backend Skills : Node.js, Express.js

Databases and API Integration: MongoDB, NoSQL, REST, RESTful API's, Postman

Tools and Methodologies: Git, GitHub.

Soft Skills: Time Management, Problem-Solving, Critical Thinking, Leadership, Collaboration.

WORK EXPERIENCE

Full Stack Developer Intern | Delta Sigma Technologies

2023

1. Developed a Writeups Platform using the MERN stack, enhancing user engagement and content management.
2. Collaborated on a Student Department portal, improving communication and resource sharing among students and faculty.
3. Strengthened full stack development skills and fostered effective teamwork through hands-on project experience.

MERN FULL STACK DEVELOPEMENT | FULL STACK ACADEMY

2024-2025

1. Completed a comprehensive Full Stack Development course at Fullstack Academy, mastering front-end and back-end technologies.
2. Developed practical projects, including a Supply Chain Management System and a Groceries List application.
3. Enhanced skills in building dynamic web applications and effective collaboration in development environments.

PROJECTS

Groceries List

2024

- Designed and developed a feature-rich grocery list application to streamline item tracking and management.
- Leveraged the **MERN stack** (MongoDB, Express.js, React.js, Node.js) for full-stack development, ensuring a modern and robust architecture.
- Delivered a responsive user interface with core functionalities such as item persistence, editing, and deletion, enhancing user convenience.

Student Department

2023

- Built a web-based application to manage and organize student records across various departments.
- Employed the **MERN stack** for seamless backend and frontend integration, ensuring efficient data handling.
- Implemented features to add, update, retrieve, and assign students to specific departments, streamlining administrative tasks.

CERTIFICATION

MERN FULL STACK DEVELOPMENT | Full Stack Academy

2024-2025

Full Stack Development Internship (MERN) | Delta Sigma Technologies and Cephei Consultants Australia.

May 2023

EDUCATION

Muffakham jah college of Engineering and Technology

2020 – 2024

Electronics and Communication Engineering

CGPA: 7.09/10
